Vinyl Banner - 2' x 10'

(Grommets will be added to all 4 corners and approximately every 24 inches, unless specified otherwise)

SAFE ZONE: All critical elements (text, logos, etc.) must be kept inside this area to ensure no important elements are trimmed from the final piece. This area is positioned 1/8 inch inside the trim line.

BLEED AREA: Background images or colors should extend to the edge of this area to ensure full-color, borderless printing. This area extends 1/8 inch beyond the trim line.

TRIM LINE: The trim line represents where the piece will be cut and indicates the final size of the piece. Pro Tip: Due to production variance, it's recommended to keep borders at least 1/8 inch away from the trim line or avoid them completely.

FOLD LINE: Dotted lines indicate where folds occur (if applicable).
